Sixty-three per cent of the 1,119 individuals, including male civilians, women and returned soldiers and sailors, who applied for jobs through the United States employment service during the week ended May 31 were placed in industrial occupations, according to the report of Dr. J. T. Ware, federal director of employment in Tennessee.

Dr. Ware's report shows that 1,119 persons registered for employment; 955 were examined and referred to the 1,099 employers, and 712 are known to have been placed in employment.

Placements for the week were: Men. 64 per cent; women, 52 per cent. These placements were figured on the reports submitted by the six offices of the federal employment service in Tennessee.

It is expected that the congress will take early action on bills providing for the maintenance of the United States employment service which have been introduced with the indorsement of President Wilson and Secretary of Labor Wilson. The sentiment in favor of the government's free employment bureau is almost solid in Tennessee, as in other parts of the United States, Dr. Ware has been assured that the Tennessee delegation is solidly in favor of the appropriation bills.
